

BrowserLinux 354

<http://www.puppylinux.org/downloads/puplets/browserlinux-354>

BrowserLinux is a fast and small (**79 Mb!**) linux distribution for surfing the web.

- Web-browser (Firefox 3.5.4)
- Flash 10 (Fullscreen Youtube)
- PDF-reader
- Music Player (Alsaplayer)
- Asus Eee: wireless tested on EeePC 900 (see [BrowserLinux on USB drive](#))

If you want an operating system with software for writing letters or printing spreadsheets: don't use Browserlinux. Browserlinux is for browsing the web. If you want more, use Puppy Linux! This software may help you: Java in browser, Movieplayer: see [Extra](#)
